

Biography: Kellie Crouch

Biosolids Team
Water Quality Division
Texas Commission on Environmental Quality

Current Position

Kellie Crouch is a Biosolids Coordinator with the Land Application Team of the Water Quality Assessment Section.

Prior Experience and Education

She joined the TCEQ in September 1999, first reviewing applications and writing registrations for sludge beneficial land application sites, later working with the Petroleum Storage Tank Reimbursement Program, followed by many years of working with the Water Quality Division's Applications Review and Processing Team. In October 2006 Kellie joined the Land Application Team and currently reviews applications and drafts permits and registrations for beneficial land application of biosolids, water treatment plant residuals, and domestic septage, as well as permits for processing and disposal of sewage sludge materials. She also has experience reviewing applications for and drafting of Texas Pollutant Discharge Elimination System permits and effluent land application permits for domestic wastewater treatment facilities throughout the state.

Kellie holds a Bachelor of Science Degree in Geography and Planning from Texas State University and a Master of Science Degree in Geography, emphasizing impacts of policy development on internationally shared waters, from Texas A&M University.
